

4. Conditional Statements

Introduction to conditional statements: if, else, elif.

- That is allow your code to make decision and execute different code block based on true or false.

1. If statement

- If condition
Code to execute if condition is true.
- The if statement is used to execute a block of code only if a condition is true.

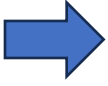

2. If-else statement

- If condition
 #Code
Else:
 #code

3. If-elif-else statement

- If condition
 #code
Elif
 #condition
Elif
 #condition
Else:

#code above condition false

Nested if statement

- A nested if statement means using an if statement inside another if statement. It is used when we need to check multiple conditions one after another.

- If condition
 If condition
 #code both true
Else:
 #code
Else:
 #code
